SUPPLEMENT TO REPORT NO.

25X1X

- 1. The foundry is located in Novi Sad, southwest of the railroad station, 200 meters south of the Novi Sad-Sombor railroad line and west of the road which connects the suburb of Telep and the Fluvial Marine base. To the east of this road and in the vicinity of the Novi Sad Foundry, there is another installation identified as the Vojvodina Foundry.
- 2. The Novi Sad Foundry is administered by the Provincial Directorate for the Wood and Metal Industry of the Poople's Republic of Serbia. The director of the foundry is Bogoljub Persic.
- 3. The foundry produces verious parts for industrial presses and scrapers, designated as the lighten type "NS-2", as well as complete presses. In addition to these produces, various spare parts are manufactured in fulfillment of orders issued by other installations under the Directorate. The production capacity of the foundry is estimated at from 10 to 12 industrial presses per month; however, the actual output is reported to be from 4 to 7 presses. The finished products are sold to various Yugoslav industrial enterprises except for thos; products which have been specifically ordered by other installations.
- 4. The Novi Sad Foundry employs approximately 500 workers, 150 of whom are skilled laborers. The administrative personnel comprises 50 men: two engineers, three technicians and ten experts in unspecified fields. The Machine Tools Factory in Novi Sad is also under the direction of the foundry.
- 5. Raw material for the foundry is provided by the "Otpad" enterprise through the Novi Sad Main Executive People's Board. The quantity of raw materials available is said to be sufficient; however, there are certain unspecified types of material which are not obtainable.
- All of the buildings of the Novi Sad Foundry are one-story constructions. The number of these buildings is not specified but they contain the following
